

Caregiver Consult New Service

To meet the challenging needs of caring for an older person with dementia in a timely frame MemoryCare is offering a new service. The service is primarily for caregivers not currently enrolled in MemoryCare who need help locating suitable resources to assist them in caring for their loved one. Families considering enrollment may choose to utilize this service prior to their enrollment, if they have a more immediate non-medical need.

A one hour consultation will take place with a MemoryCare trained professional to review specific caregiver needs and provide support and guidance toward available resources. Examples of areas where this service can be of help include: direction in finding respite services, guidance in evaluating facility care, education in how to handle dementia related behaviors, managing caregiver stress, finding dementia appropriate activities, and where to take fraud concerns.

Pamela Lessig has helped adults deal with important decisions regarding the care of their loved one for years. She has worked at MemoryCare as a caremanager and counseled families with eldercare issues. Her credentials include an M.A, M.B.A, and an L.P.C.

The cost for this service is \$55. For more information, please contact MemoryCare at 771-2219.
